

Ms. Esther Kemigisha is a Ph.D. fellow in the department of environmental management, Makerere University. She holds a Bachelor of Science and Master of Science in Forestry of Makerere university. Her career combines both research and technical experience, narrowing the gap between research and practice. Her research area covers aspects of environmental policies in the field of forestry and nature conservation, with a particular focus on climate change mitigation and adaptation. Ms. Kemigisha has published in peer-reviewed journals in the fields of forest conservation, climate change mitigation and adaptation, with 9 years of experience. She has made presentations in national and international conferences in the fields of forestry, food security, and environmental sustainability. She presented a winning poster in the Pan African Chemistry Network (PACN) Congress on agricultural productivity and has won research grants as a lead investigator with a number of institutions, including the Research and Innovations Fund (RIF) program award by Makerere University Uganda, and the fund on Neglected and Underutilised species (NUS) awarded by the International Foundation for Science (IFS). She has also participated in various consultancies, in the fields of carbon certification, farm income enhancement and forest conservation programs. Regarding her technical experience, Ms. Kemigisha has participated in the implementation of government programs on farm income enhancement and forest conservation, in the Ministry of Water and Environment and afforestation programs with the National Forestry Authority in Uganda.
